

**GENERAL
HYDROPONICS®**

Bringing Nature and Technology Together

Liquid KoolBloom™ is a concentrated nutrient additive that promotes intense flowering and helps facilitate bulking and ripening in annual plants. A very small amount of Liquid KoolBloom provides a significant amount of phosphorus and potassium that is essential for flowering plants. Liquid KoolBloom will enhance the production of essential oils and fragrance in many flowers, culinary and medicinal herbs.

Usage: Use Liquid KoolBloom throughout the entire flowering and ripening stage of plant growth.

For Hydroponics: Mix your usual nutrient solution, then add 1 to 2 tsp. Liquid KoolBloom per gallon.

For Soil: Add 1 to 2 tsp. Liquid KoolBloom per gallon of water, then apply according to your normal watering schedule.
